Get nice visual effects by organizing content into **blocks**. Title background color matches the red from DTU logo.

Framed blocks

Use the `tcolorbox` package to get a calm and customizable block.

Custom block

The package has many options to change the appearance of the blocks.

Demonstration Tables

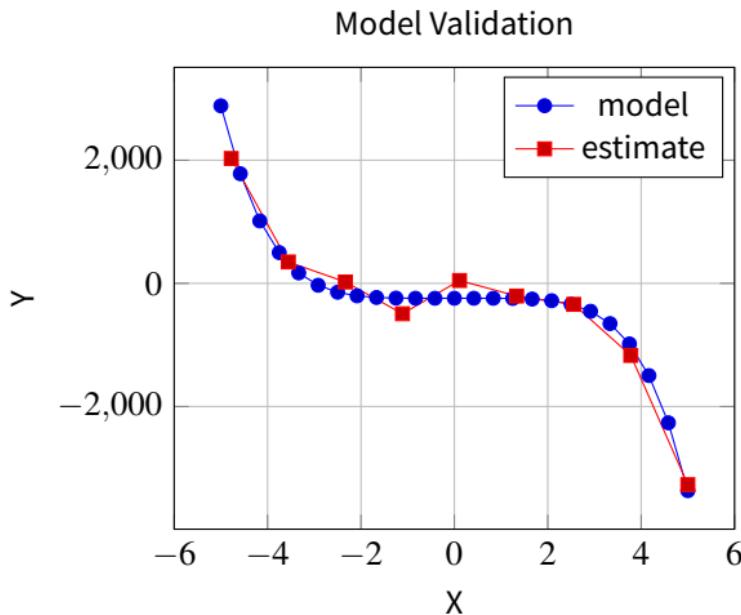

Table: Not a regular table. Content is aligned with respect to the decimal symbol.

Demonstration

Hello Blackness

Technical University of Denmark

Here is another frame style!

- You can set whatever font you like in the preamble. E.g.:
 - \usepackage{lmodern} % Latin Modern
 - \usepackage{helvet} % Helvetica
 - \usepackage[nofligs]{verdana} % Verdana
 - \usepackage{newtx, newtxmath} % Times (text and math)
- DTU recommends Verdana but this font type is not available by default on all operating systems:
 - **Windows:** include the verdana package in the preamble and MiKTeX will do the rest. Remember to set the \usepackage [nofligs]{verdana} option due to missing ligatures in new versions of Microsoft's Verdana font.
 - **Linux and OS X:** before including the verdana package in your preamble, run the `install_fonts.sh` script from our package. The old versions of Verdana include more ligatures and no special option has to be set.
